

exitGraphMode

```
graph LR; A[exitGraphMode] --> B[exit_graphic_mode]
```

A diagram showing a mapping from the identifier 'exitGraphMode' to the identifier 'exit_graphic_mode'. The identifier 'exitGraphMode' is contained within a gray rectangular box on the left. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The identifier 'exit_graphic_mode' is contained within the white box. Both boxes have a thin black border.
